

The British Tunnelling Society Young Members Committee presents an evening of talks on

Innovation in Tunnelling

on

Thursday 16th June 2011 at 6.00pm

at

**Thomas Telford Theatre, The Institution of Civil Engineers,
One Great George Street, Westminster, London SW1P 3AA**

Please come and join us for a series of short talks on some of the latest cutting edge technological innovations developed for use within the tunnelling industry, and gain an insight into some of the most advanced products emerging onto the scene from leading experts.

The evening's talks will focus on three recent innovations, which include:

- MoJet® tunnel ventilation – The Thrills and Pitfalls of New Product Development by Dr Fathi Tarada (Mosen Ltd)
- Optical Fibres in Monitoring by Mohammed El Shafie (Cambridge University)
- Energy Heating from Pipes in Tunnel Linings by Michael Moseley and Ralph Winterling (Rehau United Polymer Solutions Ltd)

The evening will also provide a chance for you to ask the experts about these systems and how they may be applied to tunnel construction on future projects.

Tea and biscuits will be available at 5:30pm
Advance booking not required
The event will be followed by a social in the ICE bar
